Call for Contributions

BENEVOL 2013: 12th BElgian-NEtherlands software eVOLution seminar

Mons, Belgium, 16-17 December 2013

The BENEVOL software evolution research seminar aims to gather junior and senior researchers from Belgium and neighboring countries to meet and to discuss new ideas, important problems and obtained research results in the field of software evolution.

Prospective speakers (junior or senior researchers or practitioners active in the field) are invited to submit an extended abstract (max. 2 A4 pages) of a talk. Based on these extended abstracts, the organization will construct an exciting program. *The seminar particularly welcomes presentations of ongoing research or tools developed by PhD students.* Senior researchers will provide the necessary feedback and lively discussions.

Submissions should be sent by **15 October 2013** via e-mail to tom.mens@umons.ac.be and mathieu.goeminne@umons.ac.be. There will be no formal proceedings, so that participants can benefit from feedback received during BENEVOL to resubmit their work to other scientific venues.

Attendance to BENEVOL 2013 is **free** (including lunch, coffee breaks and dinner), but registration is required via the website until *15 November 2013*.

As every year, we will have invited talks by key researchers in the field:

- Bram Adams (Polytechnique de Montréal) will talk about "The impact of release engineering on software evolution"
- Harald Gall (University of Zurich) will talk about "Replication and Benchmarking: Challenges for Software Evolution Data Analysis"

For more information on attendance, accommodation, registration, and so on, please consult http://informatique.umons.ac.be/genlog/benevol2013
